ProSec® PREMIUM LINEAR CUTTER

ProSec® Premium Linear Cutter is a single-use instrument that places two double-staggered rows of titanium staples and simultaneously divides the tissue between the two rows. The reload comprises of complete assembly of a cartridge and knife bar. The instrument is used for resection and side-to-side anastomosis in open GI and Thoracic procedures.

60 80 100

Features and Benefits

- Reinforced thickened steel instrument forks ensure proper staple formation
- Brand new knife blade in each cartridge ensures better cutting performance
- Unique cartridge surface for better grip to provide minimum tissue slippage for precise transection
- Better mucosal capture improves staple line integrity and leak resistance, and provides optimal conditions for tissue healing
- Rear or centre hinge clamping for one-handed positioning
- Adjustable firing knob gives surgeons ability to fire from either side of instrument
- Quick release button for easy unclamping and removal of forks
- Safety lock-out prevents accidental pre-firing before clamping, providing enhanced patient safety; ergonomic rubber inlay grips for comfortable and firm handling
