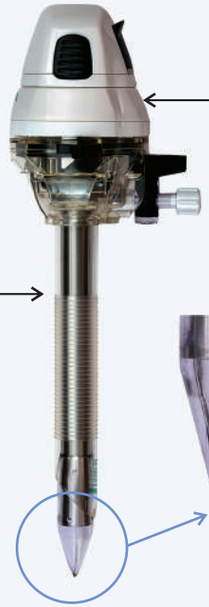
ENDOSURGERY

Ultimate Care and Comfort in Laparoscopic Surgery



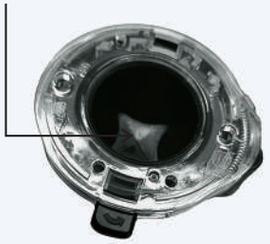
ENDO CARE PLUS

Low Profile Housing
Enables further instrument reach

Integrated Stability Sleeve Design
Maximises abdominal wall retention for minimal trocar slip-outs

Innovative Bladeless Obturator
- Low port site herniation rate
- Reduces risk of abdominal wall vascular injuries with bleeding complications

Quad-Leaf Primary Seal
Maintains pneumoperitonium, prevents escape of gas during instrument exchange.
Easy passage/retrieval of Hook electrode

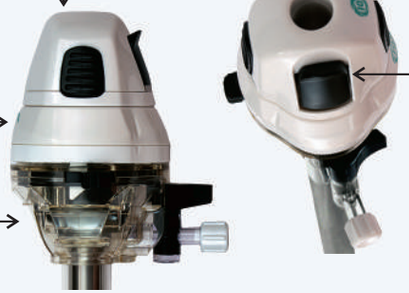


Optical Entry
Enables visualisation of tissue layers during insertion. Eliminates accidental visceral trauma

Curved Head Design
Easy to palm during insertion, Convenient to use

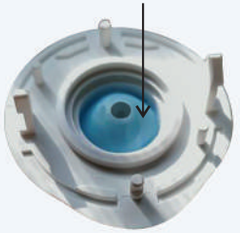
Compact Housing
Optimal use of space with increased efficiency

Ergonomic Shoulder
Easy finger grip on both sides for controlled entry

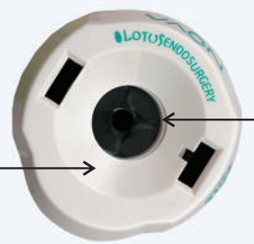


Camera/Scope Locking Tab
Holds Camera locked in position during visual entry. Protects laparoscope from scratching or sliding in

Tough Silicone Liner
Maintains insufflation during exchange of different diameter instruments



Durable Universal Iris Valve
5-10 , 5-12, 5-15
- No reducers needed
- Reduces Drag force by over 35%
- Accommodates wide range of instrument sizes 47mm–129mm, including Ubersonic Marvel



Conical Lead-in
Smooth one-handed instrument exchange

ProLap® NOVA™

Bladeless Optical Trocars

Ultimate Comfort and Safety in Laparoscopic Surgery
